

Esquimau en déménagement oder Meccano Weisheiten, 2009

Que dire de cette forêt de relations et de correspondances?

Paul Valéry „Monsieur Teste“

„Meccano is more than just a toy! Provided he follows the rules, according to which real-world devices are produced and with the help of Meccano, a young boy could construct a miniature world of well functioning devices. Thus he will learn about the world while enjoying himself.“

I was lucky not to have read this very important paragraph in the Meccano do-it-yourself manual before starting the work on esquimau en déménagement. Free from constraints, I could indulge in a delectable juggle play with sets of construction pieces of a different kind: words, sentences, punctuation and images. Following the principle of chance while mounting them together in a simple, amateurish way, provided pleasure and even the hope that a parallel world of phantasy and humor will spring into life.

Concept and realisation: Krassimira Drenska 2009. Installation of 15 circular embroidery frames, silkscreen and golden thread embroidery on cotton. Book in a 18 x 20,6 cm wooden case, silkscreen on japanese paper.

Krassimira Drenska
